Reference letter

To whom it may concern.

I am writing this letter to recommend the services of TechSolutions Group sp. z o.o. During the past 5 years our company has been working with TechSolutions Group on numerous different kinds of projects:

- organizing and conducting training: "Methodology for calculating the kinematic gauge of tramway vehicles" (2013),
- measurement and evaluation of noise inside the tramway (2014),
- assessment of vibration level of a tramway drive system (2014),
- preparation of a description of solutions that can be used in a tram to reduce running noise from the wheel-rail contact, based on current trends in public transport (2014),
- experimental verification of the tramway bogie steering system (2015),
- acoustic measurements of the compressor and technical support for its assembly in the vehicle (2016),
- experimental verification of a tramway kinematic gauge (2017).

Our cooperation has shown that TechSolutions Group is a reliable, trustworthy company with timely implementation of work, qualified employees and full technical facilities. We can honestly recognize that it fully deserves recommendations as a professional business partner.
